

MCA Certification Portal

Dear MCA Stakeholders,

The countdown to the new Certification Portal continues!

We anticipate commencing **data migration** during the **last week of June 2026**, during which user data from the past five years will be transferred to the new platform ahead of its anticipated **launch in the second week of July 2026**. To facilitate this process, the current certification portal will be temporarily unavailable for approximately two weeks, and we will communicate the confirmed migration and launch dates as soon as they are finalised.

How can you prepare?

- ✓ Download and save any certificates you wish to retain
- ✓ Company Administrators: Please ensure that your representatives and teams are up to date with their certification requirements before the week of 29 June 2026.

We appreciate your patience and support as we take this exciting step forward. Thank you for joining us on this journey—we look forward to welcoming you to the new MCA Certification Portal very soon!

Kind regards,

MCA Team
